

## OX BODIES PRODUCT IMPROVEMENT BULLETIN

### Ox Bodies Chain Attachment

Attn: Ox Bodies customers Date: 7/5/18

Effective 7/5/18 Ox Bodies is implementing the following change on all relevant products.

Ox Bodies is implementing a new chain attachment that will allow for easy replacement and removal. This product improvement also reduces stress on the outer posts of the tailgate during heavy spreading operations. The chain hook and chain guide have been removed from all tailgates, and a new bracket has been implemented that allows for easier chain replacement through a ½ inch bolt. The lower placement of the spreader chain eliminates excess stress on the outer posts during heavy spreading operations.
