The Stampede family of dump bodies can meet just about any application need with their rugged build and virtually self-cleaning elliptical design. All come standard with 1/4" Hardox 450 material interior.

Ox Bodies' line of Stampede dump bodies addresses all your heavy duty application needs. With 26" radius sides, using our elliptical design, material easily flows out leaving little behind. Some of the standard features of the Stampede product family include:

- 8-30 yard capacity, 1/4" Hardox 450 interior, corrosion-resistant continuous welds on the Blue Stampede and overlapped floor seams with double welds on the Stampede XD
- Front doghouse hoist, full length outer skirts, 8" I-beam @ 24lbs per ft. long sills on the Stampede XD as well as 1/4" wall 4" x 4" tubing, diamond mounted top rails
- Custom wiring harness, cable-to-pump air-shift PTO controls, Driver's side steps & grab handles, plus interior steps
- Heavy duty push bumper apron, epoxy primer and polyurethane top coat

All these features and more, along with additional options can be found listed in our literature on our website at [www.oxbodies.com](http://www.oxbodies.com). When you go there, don't forget to check out the answer to the trivia question.

**Ox SuperDump...**The next generation of SUPERDUMPS...

Look for an update next month announcing where 3 new Ox SuperDumps will be performing.
