

WASHOUT RESIDUE

Bodies

OX BODIES

"As Strong As An Ox"®

Rugged Reliability

- Liquids are moved through baffles to a separate cabinet area which allows water to be stored and pumped out quickly providing less frequency of dumping concrete residue
- Easy on-site set up with one-step body placement and minimize the time required for set-up, clean-out, and transit
- Roll-off body style provides portability to either individual construction sites or storing at a central washout station
- Swing-away tailgate and elliptical body style allow concrete residue to be quickly removed from the body when dumping

WASHOUT RESIDUE

Meet state and local regulations with a cost-effective solution from Ox Bodies. Ox builds in high quality features to ensure maximum convenience to get concrete trucks back on the job.

Standard Features

- 14' Body Length
- Front hook and rollers
- 30" Front height
- 42" Rear height
- 20" Elliptical Side Radius
- 7 ga steel materials used throughout
- Liquid cabinet storage is 24"x30"
- Water-tight swing out tailgate

Allowing liquids to be separated minimizes the frequency of dumping.

Separate cabinet area stores liquids to be pumped out.

Watertight container minimizes the risk of caustic wastewater being disposed improperly.

Swing-away tailgate makes unloading efficient.
